EXPERIENCE

Product Manager, Enterprise Products
Meta Platforms, Inc. | Denver, CO | Aug-21 – Present
Defining and managing product roadmap, backlog and strategy for five internal products/data platforms, which process and integrate intern data.
- Prioritizing features using the RICE framework.
- Communicating with cross-functional teams including users, engineering, design, and marketing.
- Composing business cases and user stories which align with agile software development, including Scrum and Kanban frameworks.
- Monitoring key performance indicators, focusing on user engagement.

Manager
PricewaterhouseCoopers LLP | Denver, CO | Jan-20 – Aug-21
Managed large-scale SaaS and PaaS product roadmaps and execution of three full development cycles, design multi-pillar architecture, and built client relationships.
- Solutions architect for business process designs, creating/monitoring budgets against resource hours and expenses, and developing/maintaining RICEW (reports, interfaces, conversions, extensions, and workflows) development inventory.
- Built complex PaaS solutions and SQL programs, calling REST APIs and integrating date inbound and outbound.
- Directed sprint planning with cross-track teams and customers to guide program on planned achievements, delivery, and outcomes for the upcoming sprint.

Senior Associate
PricewaterhouseCoopers LLP | Denver, CO | Jan-18 – Jan-20
Track lead for four full development cycles of SaaS and PaaS applications for large consumer market organizations.
- Created fit/gap analysis, process flows, and narratives to articulate business requirements.
- Designed integration architecture with products including Oracle, Workday, Workiva, Salesforce, and Coupa.
- Led software testing, leveraging Jira to drive agile development.

Technical Lead
American Lighting, Inc. | Denver, CO | Aug-17 – Jan-18
Technical project lead for full cycle ERP/SCM Oracle Fusion development, which includes AP, AR, GL, CM, and FA as well as subledger accounting.
- Developed credit card processing integration between Worldpay and Oracle Fusion, requiring SFTP processed transactions for authorization.

Financial Systems Manager
Pacific Facility Maintenance, Inc. | Denver, CO | Jan-15 – Aug-17
Directly managed team of seven that oversaw AR, AP, Billing, Credit and Payroll transactions through financial systems and ETL integrations for all divisions across five states with combined annual revenues of $7.8 million.
- Built Python scripts to efficiently process data files to meet business requirements and strategic integration process.

MOST PROUD OF

Building Software Products
Built, maintained, and marketed Alteryx/Python automation products which were selected out of 7000 automations for customer sale.

Coaching
Responsibility in coaching and guiding 12+ associates and interns on their career paths.

Full-Stack Web Development
Hands-on creation of 10+ front-end/back-end applications, using express.js to create APIs and interacting with data through relational and NoSQL databases.
